ROAD SAFETY EDUCATORS WORKSHOP

Towards Zero: A Whole of Community Approach to Road Safety Education

We are delighted to be working with the Road Safety Education Reference Group Australasia (RSEGA), involving all Australian and New Zealand jurisdictional educational agencies, to bring you a comprehensive program to support excellence across the road safety education sector.

Date: Wednesday 3 October 2018

Time: 1.30pm–3.10pm

Venue: International Convention Centre Sydney

Road safety education is a crucial element of the Safe System. Road safety needs to be visible well beyond the curriculum, as children, young people and their families travel on the network every day.

This workshop will focus on how early childhood services, schools, families and local communities can sustain positive, reciprocal interactions beyond the classroom to support the road safety education of children and young people.
