

# MONASH University

## Director, Monash University Accident Research Centre

### The University

Monash University is a highly ranked, energetic and dynamic university committed to quality education, outstanding research and international engagement. One of Australia's Group of Eight research intensive universities, it strives to make a positive impact through collaboration with others and is committed to a sustainable future.

The University has an annual budget of approximately AUD\$1.8 billion, over 67,000 students enrolled across its Australian and off-shore campuses, and employs in excess of 8,000 staff.

### The Opportunity

Established in 1987, the Monash University Accident Research Centre (MUARC) is one of the most significant injury research facilities of its kind in the world. MUARC brings an interdisciplinary perspective and safe systems-based approach, focused on the primary, secondary and tertiary prevention of injury across transport, workplace, home and community settings. The Centre draws upon the substantial strengths Monash has in all the core disciplines of statistics, engineering, epidemiology, health sciences and behavioural sciences.

The University is seeking an outstanding individual to provide strong leadership to MUARC in all aspects of strategy, management and financial viability to increase the quality, scale and impact of injury research and education at Monash. In particular, the role calls for exceptional stakeholder management skills and the ability to drive contract, consulting and grant income for the Centre. This is an exciting opportunity for a visionary leader to take MUARC to a new level of impact and prominence. The role requires a strong appreciation and commitment to interdisciplinary opportunities and the capacity to engage successfully across the faculties and the broader Monash academic community to facilitate and coordinate University-wide research endeavours. While the Director will require a national or international reputation in the field of injury prevention or a cognate field, a background in higher education is not essential.
